A1 Cell Lot # and Expiration
I-111658 Exp 05/08/2026
B Cell Lot# and Expiration
I-113658 Exp 05/08/2026

Interpretation of Results

Positive	Presence of hemolysis and/or agglutination with a reaction strength of $\geq 1+$ of A1 and/or B reagent cells with diluted (1:100) donor plasma indicates a positive test. Donor unit is disqualified as LTOWB.
Negative	Absence of hemolysis or agglutination or a weak (W+) reaction of both A1 and B reagent cells with diluted (1:100) donor plasma indicates a negative test. Donor unit is qualified as LTOWB.
